

## ELPLAST manufactures the EL-ZIP™ brand of press to close zippers for flexible packaging.

**ELPLAST** currently supplies more than 400 million meters (1 billion feet) of press to close zipper annually to customers in over 50 countries on 5 continents. With over 40 years experience in plastic processing including both profile extrusion and injection molding, be confident in our ability to deliver one of the highest quality zipper products on the market today. Our manufacturing processes adhere to ISO 22000:2005 (global standard for food security and hygiene) and BRC/IoP.

**ELPLAST** certifies compliance with FDA food contact guidelines including the guidelines established in the Organic Foods Production Act of 1990 and the USDA National Organic Program.

**EL-ZIP™** brand zippers are available in over 150 different styles from 3 – 50 mm wide with sealing capability to PE, CPP, and OPP sealing layers and suitable for use in the most commonly used packaging machines and processes in the industry today. We manufacture our own extrusion dies providing a quick development cycle for custom zippers to meet even the most demanding customer requirements.
